

SALISTA

Algae Calcium with
Vitamin D3, C & K2

سالیستا
الچی کیلشیم کے ساتھ
وٹامن ڈی ۳، سی اور کے ٹو

COMPOSITION:

Each 5mL contains:

Algae Calcium	250 mg
Vitamin D3	160 IU
Vitamin C	10 mg
Vitamin K2	2.5 mcg

(Manufacturer Specs.)

This comprehensive plant source calcium and vitamin formulation is designed to provide:

- Stronger teeth and healthier joints and bones in children.
- Contribute to bone mineral density and helps reducing the risk of fracture
- Prevent rickets and osteomalacia
- Improve immunity and energy levels in growing kids

Red Algae Calcium: Calcium is important for optimal bone and teeth health throughout the life. Red Algae Calcium is an organic calcium derived from marine red algae, proven to help increase bone mineral density. Plant source calcium is more absorbable and bioavailable.

Red Algae Calcium contains 72 other naturally combined trace minerals whereas rock calcium is not rich in other minerals.

Plant calcium showed more reduction in PTH levels in comparison to limestone calcium (PTH is a hormone that moves calcium out of the bones).

Vitamin D3: Cholecalciferol is vital for the body to effectively absorb and utilize calcium and phosphorus, which are the primary building blocks of bones and teeth. It promotes the mineralization of bone and teeth, ensuring that they are strong and resistant to decay.

Vitamin C: Vitamin C is a cofactor for enzymes involved in the production of collagen, a protein that forms the structural framework of bones and teeth. Collagen helps maintain the integrity of these tissues and is crucial for proper bone formation and repair. Vitamin C can influence the deposition and organization of calcium within bones, which is essential for bone mineralization.

VITAMIN K2 as (Menaquinone MK-7): Vitamin K2, particularly MK-7, is a vital nutrient for bone and teeth health, helping to ensure proper calcium metabolism, strengthen bones, and maintain healthy tooth enamel. It plays a role in activating proteins that build and maintain bone structure, and it may also help prevent cardiovascular issues associated with calcium buildup in blood vessels. It has a high bioavailability, a long plasma half-life.

Salista provides high source of natural, more stable Vitamin K2 as MK-7 with a very high bioavailability and a very long half-life in blood. Prevent arterial calcification and maintains arterial flexibility.

Nutrients do not work alone and their functions are interdependent. Calcium, vitamin D3, vitamin K2 and vitamin C has synergistic effect on the bone health and should ideally be taken in combination.

DOSAGE AND ADMINISTRATION

1-3 years: 5-10mL twice a day.

4 years & above: 10-15mL twice a day. Or as directed by the physician.

SIDE EFFECTS

No known side effects.

WARNING

Don't use the supplement in case of allergic reaction to any of the ingredients.

PRECAUTIONS

It is best to consult your health care provider if:
You suffer from a pre-existing medical condition.
You are taking any other medicines.

OVERDOSE AND TREATMENT

In case of accidental over dosage, contact your physician or refer to nearby healthcare facility immediately.

PRESENTATION

Salista Syrup: Bottle of 120 mL.

Mfg. En. No.: 0083

Product En. No.: 0083590183

نیوٹرا سیوٹیکل: یہ پروڈکٹ کسی بیماری کے علاج کے لئے نہیں ہے۔

Nutraceutical: Not for treatment of any disease.
